

Transmitters & Receivers

2.4 Ghz Wireless Transmitter

A year ago we began our quest to bring the same high quality we've offered in personal viewing screens to a wireless transmitter/receiver product. It was worth the wait! Our 2.4 Ghz wireless is unlike any other product on the market!

It offers a transmitter designed small enough to be mounted behind a flat-panel TV on your wall, 14-channels of CD quality sound, double the range of 900 mhz and FM based transmitters, and all the great support you've come to expect from CardioVision.

2.4Ghz TRANSMITTER FEATURES:

- Includes power supply, audio cable, Tune In Sign (w/ vinyl numbers)
- 14-Channel Selection
- Line Level Stereo Inputs [digital audio inputs available soon]
